

Major Upgrades in Version 5:

1. Flexible Ball Selection (1-8 balls)

- Interactive slider to choose 1-8 balls
- Real-time multiplier display (3.6x to 35,000x)
- Predictions now return only the selected number of balls
- Optimized for Greece KENO 20/80 format

2. Live Countdown Timer

- Real-time countdown to next draw (5-minute intervals)
- Shows exact time until next draw
- Updates every second

3. AM/PM Time Formatting

- All times now display in 12-hour format
- Current time, prediction times, and windows show AM/PM
- More user-friendly time display

4. Timing Correction System

- **Fixed the "one draw early" issue** with -5 minute offset
- Predictions now aligned with actual draw timing
- Shows timing offset in stats for transparency

5. Game Tracking & Results System

- **"Mark as Played"** button to track your games
- **Results submission** system to enter actual draw outcomes
- **Win/Loss tracking** with match counting
- **Session statistics** showing games played and win rate
- **Results history** showing last 5 games with outcomes

6. Enhanced Insights Panel

- **Always Hot Numbers:** Most frequent across all periods
- **Always Cold Numbers:** Least frequent numbers
- **Top Active Hours:** Best performing time periods
- **Best 5-Min Intervals:** Optimal prediction windows

7. Python-HTML Sync Ready

- `DEFAULT_BALL_COUNT` configured for Python export
- Structured for backend configuration updates
- Ready for CSV data integration
