Advanced Time-Based Keno Prediction System

Key Features Built From Your Data:

Time-Based Intelligence:
- **Live optimal time detection** - automatically detects when you're in a high-scoring time window
- **Top 5 optimal times** prominently displayed with your exact scores (05:35, 07:05, 10:20, etc.)
- **Current time window analysis** - shows which 15-minute window you're currently in

Confidence-Based Predictions:
- **Dynamic confidence scoring** using your formula: draws + consistency + combinations
- **Color-coded number recommendations:**
  - **Red (Hot)**: Top 4 numbers with highest frequency
  - **Gold (Warm)**: Numbers 5-8 with good patterns
  - **Blue (Cold)**: Numbers 9-12 for broader coverage

Proven Combination Analysis:
- Shows your **exact combination frequencies** (like the 2,37 combo that hits 17 times at 05:35)
- **Percentage calculations** based on your historical draw counts
- **Strategic recommendations** based on confidence levels

Actionable Strategy Guidance:
- **High confidence (85%+)**: *"Play top 6 numbers in 4 games - expect 3-4 to hit"*
- **Good confidence (75%+)**: *"Play top 4 numbers consistently - expect 2-3 to hit in 3 draws"*
- **Lower confidence**: *"Conservative approach - stick to top 3 numbers"*

Easy CSV Update Process:

When you update your CSV file, you'll need to:

1. **Re-run your Python analysis** (`keno_patterns_timev4.py`)
2. **Copy the new TIME_PATTERNS data** into the JavaScript configuration
